

Maruf Fatema Mansuri

B.Tech Computer Science and Engineering (Cyber Security)
Silver Oak University, Ahmedabad

Phone: +91 6260690038 — Email: mmaruffatema@gmail.com
LinkedIn: Profile — GitHub: Profile

Professional Summary

3rd year B.Tech student specialising in Cyber Security with a strong academic record (CGPA: 9.38/10). Focused on practical cybersecurity, AI-driven threat detection and secure systems design. Experienced IEEE leader with hands-on project delivery in interdisciplinary teams.

Education

B.Tech CSE (Cyber Security)
Silver Oak University, Ahmedabad

2024 – Present
CGPA: 9.38 / 10.0

Skills & Tools

Cybersecurity: Network Security, Threat Detection, Risk Assessment, Vulnerability Analysis, Secure Systems Design, Adversarial AI, Prompt Injection Analysis

Tools: Kali Linux, Wireshark, Nmap, Burp Suite (beginner), Metasploit (beginner)

Programming & AI: Python, Prompt Engineering, LLM Behaviour Analysis

Platforms: Linux (Red Hat certified), GitHub, TryHackMe

Projects

FireEye — AI-Based Wildfire Threat Detection System

B.Tech 2nd Year IDT Project — Live Demo

- Collaborated in an interdisciplinary team to build an AI-based wildfire detection system integrating IoT sensor data (temperature, smoke, humidity, wind speed) with machine learning for anomaly and fire pattern detection
- System consumed real-time satellite data via NASA FIRMS API and weather data via Open-Meteo to drive fire spread prediction and risk analysis
- Contributed to system design, threat alert logic and risk identification workflows; team delivered a live dashboard with real-time emergency notifications and location tracking
- Team tech stack: Python, TensorFlow, OpenCV, React/Next.js, Vercel

Pixel-Based Cybersecurity Awareness Game (Ongoing)

- Developing a story-driven pixel-art game in a team to teach cybersecurity concepts through gamified missions and security challenges
- Designing mission logic around real-world attack scenarios including phishing, social engineering and network intrusion
- Focused on making security education accessible and engaging for non-technical users

Relevant Experience

Secretary, IEEE Silver Oak University Signal Processing Society Student Branch Chapter

April 2026 – Present

- Leading AI-focused technical initiatives including hackathons, prompt engineering challenges and research events
- Managing end-to-end documentation, communication workflows and event execution for the chapter

Secretary, IEEE Women in Engineering Student Branch Affinity Group, Silver Oak University

January 2026 – March 2026

- Led chapter operations, strategic planning and execution of technical and community initiatives
- Coordinated across executive and core committee teams to drive collaboration and outreach

Content Vice Chair, IEEE Committees

May 2025 – December 2025

- Created AI-assisted content workflows for social media, event storytelling and technical reports
- Developed structured prompt frameworks for consistent, high-quality content output

LinkVerse Summer Internship

July 2025

- Delivered web development projects with focus on product thinking and execution workflows
- Built and presented project frameworks demonstrating end-to-end development lifecycle

Certifications

Red Hat Training: Getting Started with Linux Fundamentals (RH104)

Sept 2025

Red Hat, Inc. — 16 Credit Hours — Verify on Credly

Hackathons & Competitions

Bharatiya Antariksh Hackathon 2025

2025

ISRO (Indian Space Research Organisation)

- Successfully submitted an idea addressing real-world space and technology challenges
- Recognised for innovation, curiosity and commitment to advancing India's space ecosystem

Zomathon — The Data Hackathon

2025

Coding Ninjas × Zomato (Eternal)

- Participated in a data-focused hackathon demonstrating analytical thinking and data-driven problem solving
- Collaborated on real-world business data challenges in a competitive team environment

Writing & Publications

The Lock That Lies

Medium Article

- Authored an article explaining HTTPS, SSL/TLS encryption and the CIA Triad, clarifying common misconceptions around the browser padlock icon
- Discussed phishing trends involving HTTPS-enabled scam sites and Google's transition from the padlock to the tune/settings icon

Areas of Focus

- Practical cybersecurity: threat detection, vulnerability assessment, secure systems
- AI safety: LLM vulnerabilities, adversarial prompting, prompt injection
- Linux, shell scripting and network security fundamentals
- Ethical hacking and CTF problem-solving
